

X-5010 Optical Talkset

Overview

This X-5010 is an intelligent and efficient instrument that combines in one set the functions of both a digital optical phone and a stabilized light source. It is widely used in operations of installation, optical testing, maintenance and fiber attenuation value testing in data network, CATV and Telecommunication network. It can carry out full-duplex communication with high quality connection and not be affected by distance. With comfortable hand feelings, and nice outside looking, the user can easily operate on this optical tester.

Features

- Full-duplex digital communication with high quality conversation connection and low background noise
- Together with Optical Clip-on Coupler, enables on line communications available
- Combining functions of both a digital optical phone call and a stabilized light source.
- Large LCD display with backlight
- Low battery power indication
- Laser source have the modulation of 270Hz, 330Hz, 1KHz, 2KHz

X-5010 Optical Talkset

Applications

- Maintenance in Telecom
- Maintenance CATV
- Fiber Optic Lab Testing
- Other Fiber Optic Measurements

Specifications

Model No	X-0510
Wavelength (nm)	1310(A)/1550(B)
Fiber type	SM
Dynamic range (dB)	40
Distance (km)	80
Laser Device type	FP-LD
Output stability(dB, 30min, 20°C) ①	<0.05
Modulation	CW, 270Hz, 330Hz, 1KHz, 2KHz
Connector type	FC/PC(SC/PC)
Battery	3*AA, 1.5V
Battery operation time(h) ②	30 (Talk set function) 50 (laser source function)
Work temperature(°C)	-10~+60
Storage temperature (°C)	-25~+70
Dimension (mm)	200×90×50
Weight (g)	435(Include the headset)

Remark: ①: Laser source in modulation, may influence the stability of the output power, this is the normal case

②: The battery operation time is defined under the back light off, if the backlight on, the operation time may shorter.

Standard configuration:

Items	Name	No.
1	Optical Talk Set	1 Pair
2	User manual	2 pcs
3	1.5V AA battery	6 pcs
4	Cleaning Cotton swab	1 bag
	Carry Bag	2 pcs
